

CALL CENTER AGENT EVALUATION CRITERIA

UiPath Context Grounding Document

Document Information	Details
Document Type	UiPath Context Grounding Document
Version	1.0
Total Score	100 Points
Assessment Method	Weighted Sub-Criteria Scoring with Intent-Based Evaluation

1. PURPOSE

This document defines the evaluation standards used to assess Call Center Agent performance and service quality. The objective is to ensure consistent, fair, and measurable evaluation of customer interactions while maintaining a high standard of customer experience.

All criteria are evaluated using a weighted sub-criteria approach. Points are awarded only when the relevant requirement is completed or clearly evidenced.

2. EVALUATION INTERPRETATION GUIDELINES

2.1 Intent-Based Evaluation

Evaluators must assess whether the agent successfully completed the required action based on intent and outcome rather than exact wording.

The following are acceptable:

- Alternative wording
- Synonyms
- Equivalent professional expressions
- Natural conversational language
- Local language equivalents

Important: A criterion must not be failed solely because the agent did not use the exact wording shown in an example.

2.2 Examples Are Illustrative

Examples throughout this document are provided for guidance only and are not mandatory scripts.

Example Phrase	Requirement Status
Good morning / Good afternoon / Good evening / Hello / Thank you for calling	Pass
Equivalent professional greeting	Pass

2.3 Evidence-Based Assessment

Evaluators must score based on evidence present within:

- Call Transcript
- Call Recording
- Approved Knowledge Base
- Reference Materials

Do not assume information is incorrect unless clear evidence exists.
